<b>Office Action Summary</b>	<b>Application No.</b> 09/766,610	<b>Applicant(s)</b> KIZAKI, JUNICHIRO	
	<b>Examiner</b> J. Bret Dennison	<b>Art Unit</b> 2143	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. This Action is in response to Application Number 09/766,610 received on 11/16/2005.
2. Claims 1, 3-8, 10-15, 17-22, 24, 25, 27, and 28 are presented for examination.
3. The prior rejection is respectfully maintained, because the amendment filed 11/16/2005 does not sufficiently alter breadth of the claims to obviate over the applied references. The rejection issued in the Final Office Action mailed 5/21/2004 remains applicable for rejecting the claims as amended, and is therefore incorporated by reference.
4. Examiner addresses the amendments to independent claims and arguments as follows:
5. Applicant argues that “Lo fails to disclose a third control means for switching a mode for transferring the image data from the first image input device to the first application program in accordance with communication status between the first image input device and the first application program and said first control means via said second control means” [See Applicant’s Response, filed 8/15/2005, page 17 of 20, lines 14-17].

Applicant also states, “Lo merely discloses converting packets in a TWAIN protocol form into packets in RWP protocol form” [See Applicant’s Response, filed 8/15/2005, page 17 of 20, lines 15-16].

Applicant states, "Therefore, according to Lo, a communication protocol is not switched dynamically in accordance with the communication status between the first image input device and the first application program as featured in Claim 1."

6. Examiner respectfully disagrees with the argument.

Examiner was unable to determine where the claims recite anything about switching protocols "dynamically". The term "dynamically" is not mentioned in the claims.

As stated by Applicant, Lo does switch from one protocol to another, as required by the claim.

In regards to the amended limitation including "in accordance with communication status", any form of communication is in accordance with the communication status of the devices involved in the communication. Otherwise, there would be no communication.

7. As indicated by Applicant, the other independent claims 8, 15, 22, 25, and 28 are in accordance with the method of claim 1. Therefore the above reasons for rejection of claim 1 apply to the other independent claims 8, 15, 22, 25, and 28,

It is the Examiner's position that Applicant has not yet submitted claims drawn to limitations, which define the operation and apparatus of Applicant's disclosed invention in manner, which distinguishes over the prior art.

Failure for Applicant to significantly narrow definition/scope of the claims and supply arguments commensurate in scope with the claims implies the Applicant intends broad interpretation be given to the claims. The Examiner has interpreted the claims

with scope parallel to the Applicant in the response and reiterates the need for the Applicant to more clearly and distinctly define the claimed invention.

### ***Conclusion***

**Examiner's Note:** Examiner has cited particular columns and line numbers in the references applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the Examiner.

In the case of amending the claimed invention, Applicant is respectfully requested to indicate the portion(s) of the specification which dictate(s) the structure relied on for proper interpretation and also to verify and ascertain the metes and bounds of the claimed invention.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 2143

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. Bret Dennison whose telephone number is (571) 272-3910. The examiner can normally be reached on M-F 8:30am-5pm.
